

2.1:

$$ABCD \cong RSPQ$$

(A)  $\rightarrow$  corresponds

$$A \rightarrow R, B \rightarrow S, C \rightarrow P, D \rightarrow Q$$

(B)  $\cong$  congruent or equal

$$\overline{AB} \cong \overline{RS}, \overline{BC} \cong \overline{SP}, \overline{CD} \cong \overline{PQ}, \overline{DA} \cong \overline{QR}$$

(C)  $\angle$  angle

$$\angle A \cong \angle R, \angle B \cong \angle S, \angle C \cong \angle P, \angle D \cong \angle Q$$

- (D)
1. Slide RSPQ so that point P overlaps point C.
  2. Rotate RSPQ so that  $\overline{CD}$  overlaps  $\overline{PQ}$ .

Figure RSPQ overlaps ABCD perfectly.
